DETAILED ACTION

Location of Application

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1634.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to a method for quantifying expression of one or more target genes in living cells, classified in class 436, subclass 94.
 - II. Claims 34-47, drawn to a fluorescently labeled RNA binding polypeptide, classified in class 530, subclass 300.
3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as a protein binding assay.
4. Sequence Election Requirement Applicable to Groups I and II:

Art Unit: 1634

Groups I and II have SEQ ID Nos of amino acids from the nuclear export signal and the RNA binding domain. Each sequence of the nuclear export signal is patentably distinct because these sequences are structurally unrelated sequences, and a further restriction is applied to Groups I and II. Furthermore, each sequence of the RNA binding domain is patentably distinct because these sequences are structurally unrelated sequences, and a further restriction is applied to Groups I and II. Therefore, applicant must elect a single SEQ ID NO. from amino acid sequences of the nuclear export signal and elect a single SEQ ID NO. from amino acid sequences of the RNA binding domain (See MPEP 803.04). Applicant is advised that examination will be restricted to only elected SEQ ID NO. and should not to be construed as a species election.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Group I contains claims directed to the following patentably distinct species of the claimed invention:

- (1) donor/acceptor pair for fluorescence resonance energy transfer (claims 6-8)
- (2) an excimer forming-pair (claims 9 and 10)
- (3) an exciplex-forming pair (claims 11 and 12)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 1-5 and 13-33.

Art Unit: 1634

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Group II contains claims directed to the following patentably distinct species of the claimed invention:

- (1) donor/acceptor pair for fluorescence resonance energy transfer (claims 34, 40, 46, and 47)
- (2) an excimer forming-pair (claims 34, 41, and 42)
- (3) an exciplex-forming pair (claims 34, 43, and 44)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 35-39 and 45.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1.
